Check Orientation

Standard

Standard checks come FACE-UP with the low number on top. Use them in printers that load paper face-up and pull from the top or load paper face-down and pull from the bottom. Example: order standard checks for the manual tray in the HP 4050 which loads paper face-up and pulls from the top.

Inverted

Inverted checks come FACE-DOWN with the low number on top. Use them in printers that load paper face-down and pull from the top or load paper face-up and pull from the bottom. Example: order inverted checks for the regular tray in the HP 4050 which loads paper face-down and pulls from the top.
